HUNT FOR SCN8A

William is one of our pupils and he has an extremely rare and little understood genetic condition caused by a variation in a gene known as SCN8A. SCN8A is an important gene affecting how the brain functions and can have a significant impact on neurology leading often to serious hard to treat epilepsy, developmental delay and other issues.

We need your help! Because SCN8A is so rare, it has received little research or funding. We want to raise awareness and money to help children like William.

The challenge: To look for the letters S, C, N, A and the number 8 in the environment. For every one that you find you score a point. Ask friends and family to sponsor your child to collect as many points as possible.

Environmental print: Environmental print is the print of everyday life. It's the name given to the print that appears in signs, labels, and logos. Street signs, cereal packets, car registration plates, door numbers etc.

When: Please do your hunt over the half term week 29th May - 6th June 2021.

Sponsorship form: Complete and return money raised by the 13th June

Share: Please upload photos of your hunt and your discoveries to Tapestry 

THANK YOU!

SCN8A UK & IRELAND

Dedicated to improving the lives of sufferers of SCN8A and their families through support, information and medical research
